Docket No. 98N-1265

I OPPOSE THE DRAFT M.O.U. being proposed by the FDA. In particular,
I OBJECT to the definition of "inordinate amount" which restricts the availability
and the right to obtain medically necessary compounded medications by limiting
the number of prescriptions that can be shipped across state lines from specialized
compounding pharmacies.

COMMENTS:

Consumers need alternatives
to what the larger drug companies choose to
produce + market. I myself benefited
from microized progesterone long before
"Proactiva" became available. The availability
of the microized progesterone enhanced my physician's
ability to provide good care for me. This availability
should continue to be possible for others.
